

## Deputy Project Manager/Senior Project Engineer

An Oakland, CA-based professional consulting firm seeks a skilled senior civil engineer with project management and environmental engineering experience in the areas of highway and transit systems to support the delivery of transportation capital projects on a full-time basis. The pay is competitive.

The ideal candidate is a registered civil engineer with 5-10 years of experience in the transportation industry or a related field. This individual will be responsible for construction quality control, environmental engineering, and project management for complex civil construction projects. At a minimum, the engineer will perform the following tasks:

- Perform and manage conceptual to detailed design; provide design review and consultant oversight.
- Provide value engineering and project life cycle costs.
- Manage the design package so it is biddable and constructible.
- Produce reports and specifications.
- Manage the project scope and schedule.
- Work closely with senior management in design management, scheduling, procurement, document control, and other essential functions pertaining to capital project design, environmental review, and construction.
- Function as the daily point of contact to staff, consultants, vendors and external parties at the project level.
- Ensure that all project-related documentation is appropriately filed, updated and accessible to project teams.
- Actively manage the project during the design process and coordinate multidisciplinary interfaces and reviews.
- Support other departments as requested with estimates, concept design and addressing design issues.

Qualifications and characteristics:

- BS in Civil Engineering
- Professional Engineering (PE) license in California
- Project management experience required
- Minimum 5-10 years of experience in design and construction management required
- Prior experience in responsibility for projects involving multiple disciplines and/or functions across the entire project cycle: preliminary engineering and detailed design
- Strong decision-making skills
- Strong oral and written communication skills
- Strong interpersonal and leadership skills
- Ability to simultaneously coordinate and prioritize multiple long- and short-term tasks
- Strong organizational, analytical and problem-solving abilities
