

Rail Service and Integration Planning Specialist

An Oakland, CA-based professional consulting firm is seeking a talented mid-level railway Rail Service and Integration Planning Specialist for a part-time position where work will be done remotely and in Sacramento, CA. The ideal candidate will be knowledgeable about the California High-Speed Rail Authority (CHSRA) project and service parameters and familiar with all relevant rail service planning principles as well as European approaches. If you are a self-starter interested in providing excellent project support, have the ability to manage your time well and want to work with and support a wide variety of people, this job is for you. The pay is competitive.

The successful candidate's responsibilities will include, but not be limited to, the following tasks:

- Assist in the review of technical documentation during the data collection phase to prepare rail system integration approaches for the HSR rail system
- Analyze reports/design drawings/assumptions of track configurations planned within the CHSR network and connecting rail services
- Provide analytical and qualitative support for rail integration planning and prioritization of proposed integration steps
- Utilize Viriato software to establish netgraphs, stringline charts and platform occupation charts
- Prepare charts and figures to visualize integration requirements and technical solutions of rail integration steps
- Support rail stakeholder meetings and prepare material and presentations for meetings and reporting
- Share rail planning knowledge across the Working Group
- Other duties as assigned

Qualifications and Skills

- Fluency in oral and written English is required
- Familiarity with all relevant rail service planning principles is required
- Excellent organization and planning skills
- Strong rail planning and rail consulting project experience and familiarity with the 2018 California State Rail Plan and underlying data sets and planning principles
- Understanding of rail infrastructure requirements, rail operations principles and network integration implementation
- Solid presentation, verbal and written communication skills
- Strong ability to work in a team and in a highly demanding environment with competing priorities
- Knowledge of the California High Speed Rail Project and service parameters
- Previous experience in conceptual rail transportation planning and network wide service planning is desired
- Prior experience and interaction with senior rail operations stakeholders in California is preferred

Education and Training

- Bachelor's degree (or equivalent) in Planning, Policy, Administration, Civil Engineering or related field
- At least five years of qualifying professional experience in Rail or Transit Planning or implementation field
- Understanding of requirements for State Rail Plans and familiarity with the California rail system and knowledge of European rail planning approaches is desired
- Working knowledge of Viriato, Treno, STATA, and Adobe Create Studio (InDesign and Illustrator)
