

## Senior Scheduler (Part-Time and Full-Time)

An Oakland, CA-based professional consulting firm seeks part-time and full-time experienced senior schedulers to develop and review project schedules for major transit and infrastructure projects over \$100 million. The successful candidate will be responsible for developing, maintaining, reviewing, and updating Critical Path Method (CPM) schedules for clients/owners using Oracle Primavera P6 and Microsoft Project; analyzing schedules to recognize logical errors and inefficiencies; devising methods to improve process flow and speed project completion; and advising project management on all scheduling issues.

The ideal candidate has 10+ years of project scheduling experience; knowledge of scheduling principles, engineering and construction techniques, and project plans and specifications; a B.A. or B.S. in civil engineering or a related field; and is a registered civil engineer.

The successful candidate will have the ability to:

- Develop CPM schedules and perform all aspects of scheduling for assigned projects
- Maintain and analyze project schedule data
- Produce routine, accurate, and timely schedule updates
- Review contract documents and incorporate all relevant aspects into the schedule
- Monitor the schedule and advise the project manager of any trends that affect the timely project completion
- Attend project meetings to evaluate and report on progress and action items
- Review contractor and subcontractor schedules and supporting documentation to ensure the client approves schedule submittals in a timely manner
- Develop procedures to initiate and maintain document files related to the schedule
- Revise the baseline project schedule to account for changes in the scope and execution methods
- Provide project methodology assistance
- Prepare written schedule reports for the project team

Required skills:

- Expert software skills in P6; Oracle Primavera Contract Management Release 14; Oracle Database 11g Release 2, and Microsoft Project and Office
- Strong planning and forecasting skills

- Excellent verbal and written communication skills, including the ability to interface and negotiate successfully with clients, contractors, and engineers, as well as members of other organizations
- Strong project management, organizational, and time management skills
- A mathematical aptitude
